

Budapest Summer Science Camp

Discover Smart City!

Call for application

Date: 25.08.2019-31.08.2019

Location: Budapest

In 2017 and in 2018, the International Summer Science Camp took place in Budapest, Hungary. The one-week long camp gathered 100/50 students from 20 countries from all over the world.

Encouraged by the great success of these camps, we are pleased to announce the organisation of a third, similar event this summer. This year's topic is: **DISCOVER SMART CITY!** The participants will gain knowledge from successful innovative Hungarian companies and innovators by involving them in technological challenges.

OUTLINES OF THE BSC 2019

Application: As future participant you have the opportunity to choose 2 out of 6 categories,- please mark them in order of interest. As soon as we receive their choices, we will assign to them one of the three chosen startups.

Preparation: The participants will be assigned to 10 different groups according to their field of interests. Before the Science Camp the group members will have to get in online contact with each other. Each group will be designated to specially-trained animators

Participation: During the Science Camp, invited experts will give daily lectures on economical background, international legal advices and mentoring the groups for the final presentation and pitching.

In the first three days of the camp, the participants will have the opportunity to follow the given startup's everyday activities. The companies will deal out specific tasks which challenges also the professionals. The objective of this camp is to emphasize the importance of the practice oriented learning, teamwork and the development of presentation skills.

Presentation: During the closing event, students will have the opportunity to present their own idea in front of a jury, which will consist of selected professionals and investors. The 3 best conceptions will be awarded with valuable prizes!

THE FIELDS OF INTEREST
